What is SKIDOO?

SKIDOO, the battle game of Greek mythology, originated in a parallel universe where the events of that era played out differently. The online metaverse game is where the game's war is found. Each character is based on numerous well-designed elements, making your character unique and badass. By getting an NFT collectible, you can participate in developing the story narrative, representing your core faction, building an amazing project, earning money, and so much more.

Backstory

Once upon a time, Zeus, Poseidon, and Hades—three immortal brothers born to rule—lived on Earth before Zeus ruled the skies as the King of Olympus.

After their father, Cronus, and the other mighty titans were defeated by Zeus and his divine brothers,

the skies, the seas, and the underworld were divided among the three brothers.

Zeus and his divine brothers were more than just the gods of the skies, seas, and the underworld. They

became rulers and protectors of the other gods you see in Greek mythology, including Hera, Demeter,

Apollo, Dionysus, Hermes, Ares, Aphrodite, Artemis, Athena, and Hephaestus.

Storyline

Light always shines on shadows. In the absence of evil, there is no good. Neither in the universe nor inside us.

As humans, we are constantly battling between our dark and light selves. However, positive thinking has been forced upon us, and so we tend to forget about the never-ending conflict we are in and always pretend that everything is bright and white.

In mythology, there are many stories about heroes and heroines who try to save humanity. However, a good story must have both protagonists and antagonists. Evil mythological characters remind us that, despite our ability to bury these kinds of thoughts, the dark side of us is still there, and it is present in ancient mythology.

In order to keep the story's harmony and balance, SKIDOO is here to point out that there are antagonists who engage in combat with mythological heroes and heroines and attempt to overcome them.

SKIDOO depicts the duality of good and evil so realistically within mythology because, after all, this is what we believe to be true about ourselves!

SKIDOO is a beautifully designed Greek mythology action battle game that is more than just entertainment. It's the Greek story of the three brothers known as "THE BIG THREE," the true rulers of Mount Olympus, beginning with these three. The story, depending on how you look at it, could be a sibling rivalry epic or a story of divine unity. You will ultimately decide how the story should end.

Characters

The game's characters are all taken from mythological stories. There are 26 characters in the game. Every character has their individual skills and contributes to the development of their nation. Players may change characters as they want to. The characters with their skills and weapons are listed below.

God and Goddess Characters

According to mythology, the heroes and heroines did not stay on the sacred mountain. Instead, they frequently interacted with mortals. With the short descriptions of each main character as provided here, you should be able to choose the one that will most arouse your interest.

Zeus

He is the Olympian god of the sky and thunder, as well as the king of all gods and men. These titles were given to him as recognition for leading the Olympian gods in their rebellion against their Titan parent Cronus. He is depicted as a mighty ruler, holding a scepter in one hand and a thunderbolt in the other. In honor of Zeus, the Olympic Games are held once every four years.

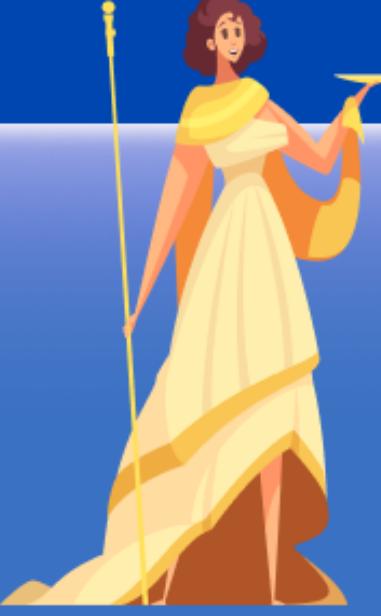

Poseidon

He is the furious and violent Olympian god of the sea, also known as "husband of the earth" or "lord of the waters." He is an impressive-looking man with a full beard, thick, curly hair, and piercing eyes. Over the waves, he is depicted wielding a trident, the three-pronged spear, a symbol of strength and vigor that is also used as the Maserati logo, a powerful Italian luxury car manufacturer.

Hades

Among the Olympian gods, he is the one in charge of the Underworld, the afterlife destination of all deceased humans. He has a beard, wears a helmet called the Helm of Darkness, and fights with a bident, a two-pronged fork. He is frequently pictured with Cerberus, the three-headed hound who guarded the entrances to the Underworld. The name of one of the most prominent private equity firms in the United States, Cerberus Capital Management, was chosen to evoke the image of protecting his client's assets.

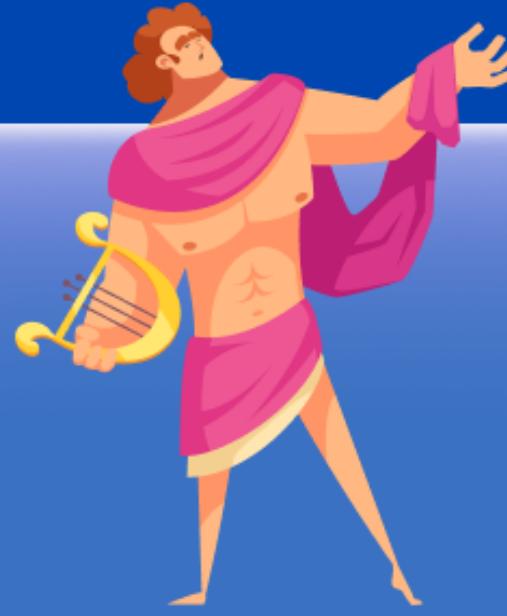

Hera

As the Olympian goddess of women, marriage, and childbirth, she is the wife of Zeus and the queen of Mount Olympus. She is typically depicted alongside Zeus as a fully clothed, solemnly beautiful matron who wears a wreath and veil and carries a scepter. The NBC Peacock logo, the colorful peacock, is attributed to the legend of the goddess and her sacred peacock.

Artemis

As an Olympian goddess, she is associated with chastity, the moon, and hunting. She is also frequently shown as a young, attractive, and vivacious huntress, complete with a quiver full of arrows, a bow, a short knee-high tunic, and, on occasion, a stag. Amazon, the e-commerce giant, was inspired by the group of powerful female warriors known as the Amazons in order to convey a sense of power, and authority to the superior business company.

Apollo

He is the Olympian god of the sun, light, music, poetry, healing, plague, prophecy, knowledge, order, beauty, archery, and agriculture. He is symbolized by a lyre, a bow and arrows, and a laurel wreath. The United States Apollo Space Program, which aimed to land people on the moon, drew inspiration for its name from the powerful god, who was known for his skill as an archer to hit his target.

Hermes

Among the many things he is associated with, he is the Olympian god of roads, flocks, commerce, and thieves. He is depicted as a young man with an athletic build and four distinguishing features: a broad-brimmed hat (petasos), a pair of winged sandals (talaria), a purse, and a herald's wand (kerykeion). Hermes, a well-known company for its ultra-luxurious leather and silk products, got its inspiration from the god of commerce to signify the excellence of its products.

Aphrodite

The Greeks worshiped her as their goddess of love, fertility, and beauty. She was so stunning that the other gods were afraid their rivalry would start a war. She wears a magical girdle and holds a shell to symbolize her ethereal qualities. The American cosmetics and hygiene company Dove got its name from the Greek goddess of love and beauty.

Athena

She is revered as the patroness of the city of Athens because of her status as the Olympian goddess of both wisdom and war. She is equipped with a long spear and an aegis, and her head is protected by an ornately crested Corinthian helmet. Athens is home to the majestic Parthenon, a stunning pillared structure built in honor of the goddess Athena as the queen of the gods.

Ares

As the Olympian god of war and courage, a rival of Athena, and commonly referred to as one of the most prominent and powerful gods, he personifies the destructive potential of battle and is often associated with extreme violence. His depiction typically features him armed with a helmet, shield, and sword or spear.

Demeter

Among the Olympians, she is revered as the goddess of grain and agriculture. Typically, she is depicted as a fully-clothed, matronly-looking woman who stands with her hand extended. She is usually symbolized by a scepter and a sheaf of wheat.

Dionysus

He is worshiped as the god of fertility and wine. Inventing wine and popularizing viticulture, he left his mark on the world. In addition, he is depicted as being flush with wine, having shoulders covered in fawn skin, and bearing rods tipped with pinecones.

Hephaestus

As the Olympian god of blacksmiths, craftsmanship, fire and metallurgy, he created mighty thunderbolts for his lord Zeus. He is usually symbolized by the fire, the axe, the tongs, and the hammer, and depicted as a bearded middle-aged man wearing a short Greek workman's tunic called "eximos."

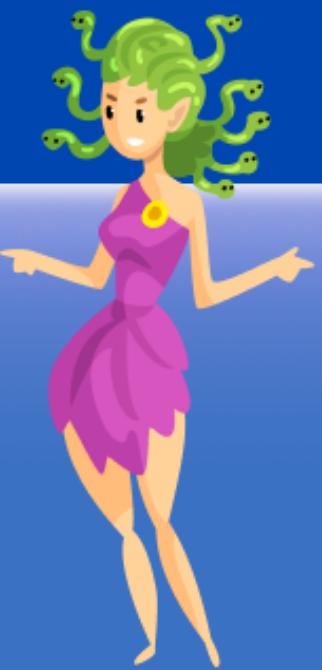

Demon and Demoness Characters

Our ancestors understood perfectly well that it's unhealthy to live with the illusion that there's no evil in the universe. Their understanding of mythological structure was inspired by a respect for reality's contradictory character. SKIDOO believed that all the evil in the universe was done by demons, demonesses, dark energies, and the like. Here are short descriptions of the worst and most evil characters in Greek mythology, which can help you choose your favorite character.

Cronus

Being the leader and youngest of the first generation of Titans, he is a destructive and all-devouring force. In most depictions, he is an elderly man holding a harpe and a scythe who commits a variety of horrible acts to ensure that no one can ever take his authority.

Medusa

One of the most famous figures in Greek mythology, a horrible female monster with snakes for hair and the power to turn someone to stone only with her gaze. Versace, a luxury Italian fashion brand, uses the symbol for its logo, which implies vanity. In a show of strength and recognition of females growing influence in culture and politics, many of the world's most well-known women, including Rihanna, Oprah Winfrey and Condoleezza Rice have publicly adopted the image of Medusa and worn a crown of snakes as a symbol.

Lucifer

As the personification of evil, he is also known as "Satan" and also called "Devil." He is depicted as a red-skinned satyr, half-goat and half-man, with pointed ears, a goatee, cloven hooves, a goat's tail, and equipped with a trident in one hand and a fire in the other.

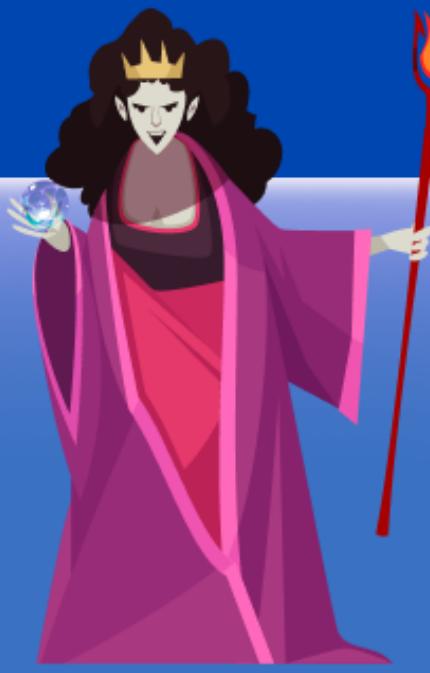

Merlin

As a magician, he was the son of an evil father; the Devil, born with demonic abilities, and depicted with his pet owl, Archimedes. He has the appearance of a grandfatherly type person with a long white beard, wears a long blue vestment and pointed wizard hat, and flies into the sky with the help of a flying ball and a magic wand.

Thanatos

As the personification of Death, he is revered and worshiped as a peaceful ending demon. A mysterious figure who evokes fear in both mortals and gods. Symbolically, he is often represented as the Grim Reaper, wearing a black cloak and holding a scythe.

Hecate

She was the supreme Titaness of the surreal and supernatural, ruled magic and witchcraft, and regulated evil spirits in the underworld as a powerful demoness. The torch and the white orb symbolize her all-encompassing power during the witching hour and beyond.

Lamia

As an evil witch and demon queen, she symbolizes hypocrisy. She is depicted as a hybrid of human and fish, with long, blonde hair, and the ability to utilize flowers to attract her prey. The night-haunting, child-devouring demoness highlighted a great deal about male worries towards the power wielded by females.

Malcanthet

The demon princess of the Abyss is the queen of Succubi, mighty female demons, depicted as an ideal woman in size and strength, and flawless figure, with black-tipped horns, pointed ears, yellow sclera with red irises, clawed fingers and dark-hued bat-like wings attached on her back.

Manticore

As one of the savage man-eaters and evil beings, he is portrayed as a gigantic, magical beast with the body of a lion, the wings of a dragon, the head of a man, razor-sharp teeth, a tail ending in a mass of poisonous spikes, and extraordinary strong claws and fangs.

Minotaur

Having the body of a man but the head of a bull, he is one of the most infamous and horrific villains from Greek mythology. He also uses his iconic weapon, the Minotaur axe, which has a long handle, to execute a wide range of cutting and throwing attacks.

Sallos

He is also known as Saleos and Zaleos. He has the ability of bewitchment as a mighty Great Duke of Hell, emerges as a warrior, and the amulet of his spirit creates love between men and women, drives sexual desire, and stimulates the passions. He is represented with a long beard, wearing a ducal crown, riding a crocodile, and holding a short spear.

Charon

He is the most well-known demon of the underworld, a figure known as a "psychopomp," whose mission is to escort the souls of the recently deceased from Earth to the Abyss, the afterlife. He is also often shown as an old man armed with a hammer and a scythe and has come to symbolize death.

Mahaha

She is a demoness with piercing white eyes whose deathly cold touch has the power to freeze enemies. She is a long-limbed, slim, skeletal evil with icy blue skin, sharp vicious nails on its long bony fingers, and a sadistic smile permanently covered on its face.

Skills

The mortals who worshipped the figures believed that the characters' abilities were infinite. They had a wide range of abilities that were unique to their own realms, but there were also a number of skills that were shared by all of the characters, which can be summarised as follows:

Creation / Chaos

In the eyes of the ancient Greeks, Creation or Chaos, is the result of a perfect storm in which all four basic elements—Air, Earth, Fire, and Water—combine into one form, which ignores movement limits created by the elements, makes saving throws against spells and other magical effects, and eventually can change the fate of the universe.

SKIDOO is here to prove that chaos is the very essence, source, and soul of creation, and to emphasize that without chaos, nothing can emerge.

Weapons

Weapons are frequently the most memorable aspects of ancient myths and legends. Undoubtedly, the gods, goddesses, demons, and demonesses who wield them stand out. Gameplay

In this adventurous and exciting world, players will be able to use a wide range of weapons and accessories. To win on the battlefield, you need to be better than your opponents in terms of fighting skills, teamwork, and survivability.

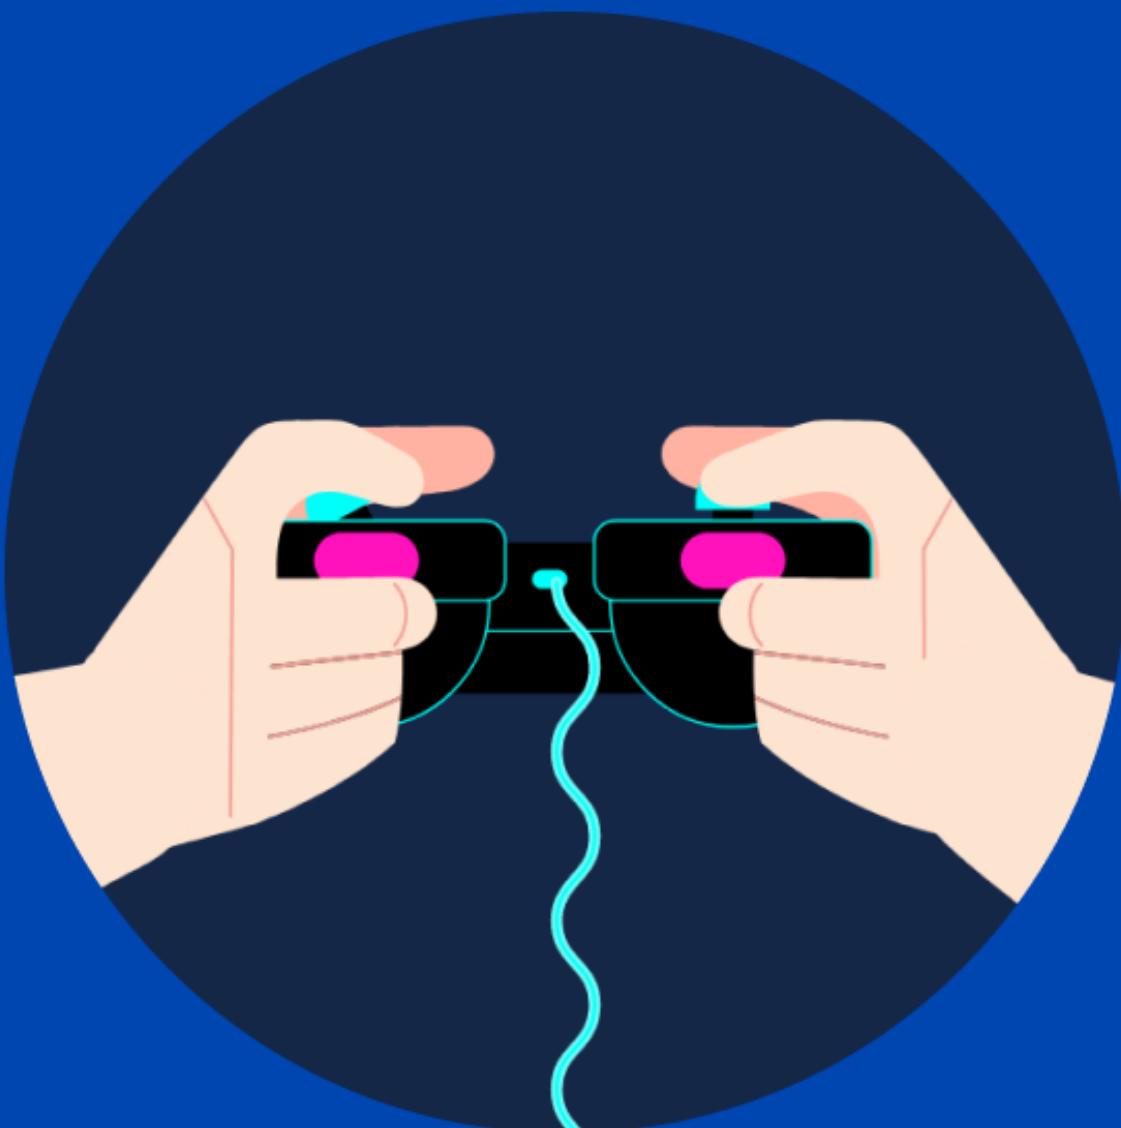

The number of people who participate in the metaverse game, SKIDOO, is a critical factor in determining how well the game will go. The more people who are online and actively engaging in the metaverse at the same moment, the higher the quality of the experience for those users will be.

How to play

This game can only be played in one of two different ways:

1. You have the option of using our VR glasses and controller to experience the game.
2. You can play first-person shooters on your smartphone even if you don't have any VR equipment by utilizing the screen on your device (Android, IOS).

Features

Basic Equipment NFT

"Basic equipment NFT" refers to the items you can get in the game that give your character more power. In this game, each piece of standard equipment has a limited number of available quantities, and certain uncommon pieces of standard equipment will be sold as very valuable NFTs.

NFT of in-game items

Players will have access to a variety of items in the game, such as positions that restore physical strength and items that improve status for a set amount of time. These elements will be included in the game.

Stamina System

The greatest amount of stamina you can have is 100. One point is restored every one minute if the player's stamina is not at its peak.

Equipment System

NFTs can be used to buy a wide range of equipment. In battle, powerful weapons and equipment will be useful.

Score System

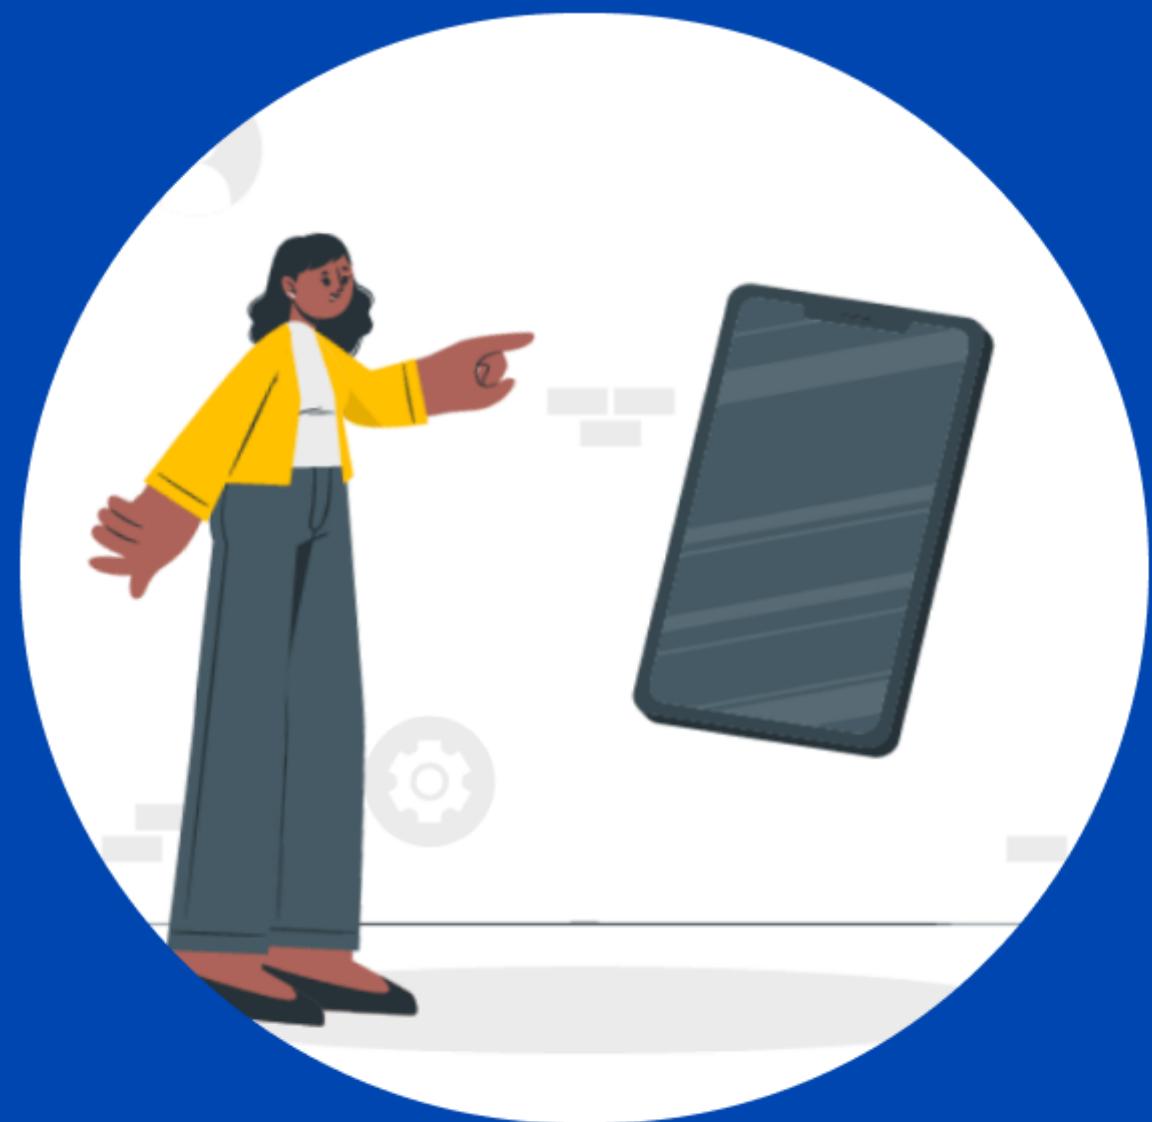

When it comes to assessing a player's skill in a game, the most important metrics are their scores. SKIDOO's smart contract is designed to automatically record the player's scores throughout gameplay. A variety of scoring systems will be used in different games. The SKIDOO scoring is based on the following formula:

Scores = sigma(CT*DP)

Scores show the player's effective scores, which include all completed levels.

CT denotes the number of in-game items touched on each level.

DP stands for the Difficulty Points of each level, and it is scaled linearly upwards.

Ranking List

It is a list of games' scores arranged in descending order on the leaderboard. The present rankings only display the top 100 seats, which indicates a lack of seats.

Notably, the rankings will change and be updated all the time, which means that every player will always be in a race.

Weekly Tournaments

To reward gamers for their participation, sponsors will hold weekly tournaments that take a snapshot of the leaderboard each week. By paying attention to the sponsor's expectations, SKIDOO will be able to offer a wider range of rewards.

Play-to-Earn

Players can acquire NFTs through different gaming activities. As a result of the game's "Play to Earn" function, you cannot earn NFTs by simply playing the game. People that cooperate together in the game and play correctly in the metaverse can make money in the game's economy, according to the design of the game system.

Anyone can profit from the sale of NFTs in the game by collecting valuable items. In some cases, you might be able to make some extra money by purchasing unusual items. It's an incredible feeling to pull this off with your friends.

The difficulty of this game will be changed so that you can earn enough money each month through the "Play to Earn" feature to support yourself.
