

The Island of fun & freedom

FOXIVERSE

Foxiverse is an unknown island in the unexplored ocean of the metaverse world. Foxiverse is a digital place that portrays and allows you to interact with your mind's fictional and serial universe. You can play and live in a world that is both real and virtual at the same time, all while having a direct impact on the physical world. Why? Because on this island, everything is possible. The island does not abide by the laws and regulations of any country and is governed by its government. The world is like a playground, and we are its players. Artificial intelligence now makes it feasible for anyone on Earth to build smaller, virtual worlds where they may live out their fantasies. There is no better place in the metaverse than Foxiverse Island if you're looking for a new start on one of the many exotic islands that await you. Foxiverse is a virtual world where individuals can develop and expand their characters. The island's explorers and developers have established a set of rules for its residents, but it is up to each individual to follow those rules. If the individual adheres to the rules, they will get points and, eventually, being recognized as a role model by the community, their level will be upgraded. (Higher-level gamers, as stated in the whitepaper, have access to higher-level facilities.) Residents on the island have the freedom to interact with one another and NPCs (Non-Player Characters) in whatever manner they like. The game's AI engine is designed in such a way that it can track players' actions on the island. Players can check in on one another's social media accounts, such as Instagram, Twitter, and Facebook, as they become close to each other. Players can approach one another to communicate if they wish to and are accepted. There are no racial or religious limitations on this island, and the residents enjoy a wide range of liberties. Although people have always done what they were supposed to do, they do not have to be passive observers in their own lives. A world exists where people can be free, but only if they are willing to fight for it and do everything they want.

The Foxiverese project belongs to 1studio.art, the pioneering group in the fields of digital art and Web3, under the ownership of Barbara Foster.

Barbara Foster is a Berlin-based artist, researcher, and engineer who has collaborated with well-known companies including Meta and Adobe. For 20 years, she has made abstract paintings to brighten dark days and studied how technological advances affect the physical world. She transitioned from traditional media to digital technology as her career in NFT grew. She has pioneered the field of digital art, and her photorealistic renderings show where simulation ends and reality begins. As a creator who works on NFT platforms, she regards NFTs as a way to showcase her digital works in their best form and spread a body of work that was either unavailable or underappreciated during its period of creation.

Guest vs Premium user

Who is the guest user?

Such a player's capability is limited to playing the game, purchasing, selling, and renting in-game items, and renting one of the 4810 available lands. They are capable of uncovering and discovering all of the island's hidden secrets. These gamers can make their own way through the game's open environment, immersing themselves in it in the most genuine way imaginable.

Who is a premium user ?

Everyone who visits the Foxiverse can become a premium player by purchasing one of the 4810 available lands (NFT). These gamers provide numerous benefits, such as exclusive Foxiverse VIP club member rewards, can earn rewards by holding the NFT, having a special VIP Avatar in the game, getting access to all game features, etc.

Here are some of the events that are exclusive to premium players:

Here are some of the events that are exclusive to premium players:

In-game Job Fairs

The event is the perfect way to find and recruit ideal candidates for your job openings. The social wall for job fairs is one of the most engaging tools in the game where you can share job boards with current vacancies, upload company profiles and videos, interact privately, and include fun elements and interactive 3D objects.

In-game Trade Shows

The events are specifically designed for premium players who want to connect with buyers worldwide in an immersive metaverse trade show. The events can range from cars, property, technology, and any other form of trade show.

In-game Concerts

The events are well-equipped in real-time on a social wall, making them the game's most significant events ever. And like in any live concert, premium players can interact together, groove, laugh, and sing along.

To get more information about the premium players advantages please read our game features below.

Foxiverse Features

Foxiverse, as well as the game world contained within it, Free Island, is a game in which you get to enjoy life rather than attempt to ruin the lives of others, as opposed to other games. Aside from video games, Foxiverse is home to a variety of amenities that would be available to players during the game. The following are the primary features available on the free island:

The DRAM Token

This is a description of the DRAM Token, which is a deflationary token that has genuine utility in our Metaverse ecosystem. DRAM allows users to upgrade their profiles, find specific people, gain access to private content, access specific groups of people, purchase houses and accessories, and play for cash.

Purchase land

You can purchase land in the metaverse, which instantly becomes an NFT with value. You can also use \$DRAM to purchase items or start a new business. A real estate agency on the island is located at No. 37, Bintang Road (Queen Street). At the agency's offices, you can find out the cost of each unit by calling them. A Polygon agent will be able to provide you with a price quote if you have the unit's postal code written on the entrance door, which you can copy and use to get a quote from them.

Play-to-earn

The more you play, the more money you earn. Users can receive DRAM rewards or NFTs for their participation, such as completing quests in the game. Users can also earn or donate DRAM tokens based on their social interactions on the island.

Governance

With DRAM , users can take part in the game's governance through a decentralized organization with its own proposals and voting systems. Voters will be rewarded in order to encourage users to participate in the process.

DeFi

A set percentage of platform income will be given out as staking rewards, allowing token holders to stake their tokens and earn rewards. The gaming platform could make money by, for example, selling land or other assets or charging transaction fees. This money would then be put into the staking pool according to a set formula.

NPC

There are NPCs, or non-player characters, who live on the island as permanent inhabitants but do not have a distinct identity outside of the game. Although they are unaware of this, they nevertheless feel themselves to be living, breathing human beings because they are constructed and programmed in this way. On the island, NPCs can interact with people or even form romantic relationships. Trial and error are how they acquire knowledge, just like us. As a result, they are free and able to do anything they want on the island, which allows them to create their surroundings according to their wishes. Using our virtual reality glasses, players may communicate with each other and non-player characters.

Cassowaries

The world's most hazardous bird, the cassowary, resides on the island's edges. Cassowaries are only aggressive when they feel threatened. Despite their shyness, if they feel threatened or frightened, they may inflict serious harm on players by kicking them or paralyzing them with their feet. They reside among marshes and lush jungles.

This island is home to three distinct species of cassowary: the southern or double-headed variety; the dwarf or bent variety; and the northern or single-headed kind.

Players are not permitted to hunt cassowaries in an unnecessary manner, and if challenged and do not feel threatened, they can be fed food in exchange for points and rewards. However, if a bird attacks, they are permitted to hunt it, and the prize for killing a cassowary is given to the avatar. And vice versa, if the avatar is hunted by the bird and loses his life, his points are reduced.

Foxiverse Map

The Foxiverse map, which was designed based on an architectural framework, is aesthetically pleasing and separated into three sections: East, West, and Center.

The central part of the island

A city hall, a conference hall, an international exhibition centre, a virtual real estate, and an NFT marketplace are just a few of the island's various components that can be found here.

Virtual Real Estate (For everyone)

A real estate agency on the island is located at No. 37, Bintang Road (Queen Street). This agency enables you to purchase land and real estate on the island. For this purpose, you can obtain the desired property price and information by submitting the postal code of the chosen unit in person or by phone.

NFT Marketplace (For everyone)

Republic Square houses the island's NFT marketplace, which includes art galleries and museums. Art galleries are places where visitors can display and sell their paintings through NFT. These galleries will enable users to significantly increase the marketability and exhibition potential of their NFTs by providing buyers, sellers, and observers with a new level of NFT interaction. The National NFT Museum (NNM), where users can display and sell a wide range of items such as automobiles, clothing, watches, luxury items, swimming and diving equipment, camping equipment, and a variety of other items via their game-in assets

City Hall (For Premium only)

A venue for ceremonies and parties, which delivers enjoyable times and a peaceful and satisfying atmosphere based on the user's needs.

DRAM Summit International Exhibition (For Premium only):

The holding of a worldwide exhibition is just one of several methods we've created for users to display and sell their digital products on Foxiverse. Once every six months, Foxiverse hosts an international exhibition called DRAM Summit, where attendees can rent a booth for a day or two to showcase their digital products to the general audience.

Conference Hall (For Premium only)

The conference hall is a space where people can come together to hold meetings or give presentations to others. It is, in fact, a space where people can work and do research using virtual reality. Digital avatars of individuals gather around a conference table in cyberspace to conduct meetings in this manner.

In the metaverse, you can conduct business meetings while sitting comfortably at home or even in bed, all while maintaining a smart and professional appearance. Yes, your dreams and fantasies are becoming a reality (an invitation link can be sent to the users outside the island and they can join the event).

Finally, it should be noted that this area is limited to premium players only.

The west side of the island

Numerous casinos, discos, and water sports can all be found in this region.

Casino (For Premium only)

The casino is a gold mine for investors. By placing wagers on their in-game assets, players can both enjoy and profit from their favorite games. All profits and bets are recorded on the blockchain network, and digital money is used to make transactions. Since the casino is on a blockchain network, it ensures greater transparency, security, and privacy than traditional brick-and-mortar casinos and eliminates the potential for fraud. For the first time, all online casinos will be featured in one spot, making it possible for everyone to play any game they want, no matter where they are.

Disco (For Premium only)

There is a spot to move and deplete your energy on the island's west side. This is the place to go if you want to dance to a variety of music. This area is intended for those who desire to live a life filled with pure enjoyment, and it gives them the freedom to do it in their own unique way, with their own sense of self-expression and self-sovereign identity. It is designed for those who desire to live an ideally pleasurable existence.

Water Sports (For everyone)

Gaming and sports are combined in Foxiverse. In the metaverse, water sports rely on cutting-edge engineering and aesthetically pleasing construction. All of the island's aquatic attractions, such as water parks, jet boards, and fly diving boards, are located here. Flyboards allow you to experience what it's like to soar above the ocean on Foxiverse Island. Yes, you'll be able to experience all of the thrills and sensations that Foxiverse Island has to offer.

The east side of the island

This region is home to a few sports arenas and clubs, as well as aerial sports and camps.

Sports Arena (For Premium only)

Looking back in time, playing sports required a physical presence, but today, thanks to advancements in science and technology, it is possible to enjoy the same thrills in the virtual and digital worlds. Foxiverse Stadium is a system that allows players to experience the real-life atmosphere of a sports arena via their avatars. Besides, individual sports can be done in the open air in a stadium, or with NPCs or other avatars to compete against one another.

Sports Club (For Premium only)

It is a multi-story enclosed environment where avatars can engage in sporting activities. On the first floor, there is a gym where individuals can work out for hours. It is also possible to form a team led by one of the avatars capable of managing and leading, and competitions between teams will be held in a few days. On the second floor, there is a category for games that may be bet on, such as boxing and wrestling. This feature lets you have a tangible sports experience at home, but online, so you don't have to be there in person

Aerial Sports (For Premium only)

Foxiverse Island's hilly region is a popular location for aerial sports like paragliding, rock climbing, slacklining, jetpacking, and bungee jumping, among others. A breathtaking and pleasurable experience awaits you as you float over the island's surface and look down at the vista below your feet.

Camp (For everyone)

campers and other outdoor lovers who wish to experience living in a camp or tent in a peaceful setting in the middle of nature can find a special place on the island. Those who like to spend their spare time away from crowds, meditating, chatting, or engaging in similar activities in peace, or who love spending time around a campfire at night, can hang out in this area. A wide variety of camping equipment, such as tents, backpacks, sleeping bags, and DIY crafts made from natural materials like wood, stone, shells, and more, can be found at local exhibitions and on the NFT marketplace. It is also possible for anyone to create this equipment, which may then be presented and sold as NFT at these locations.

NFT

Minting

Users can mint unique collections and items such as digital arts.

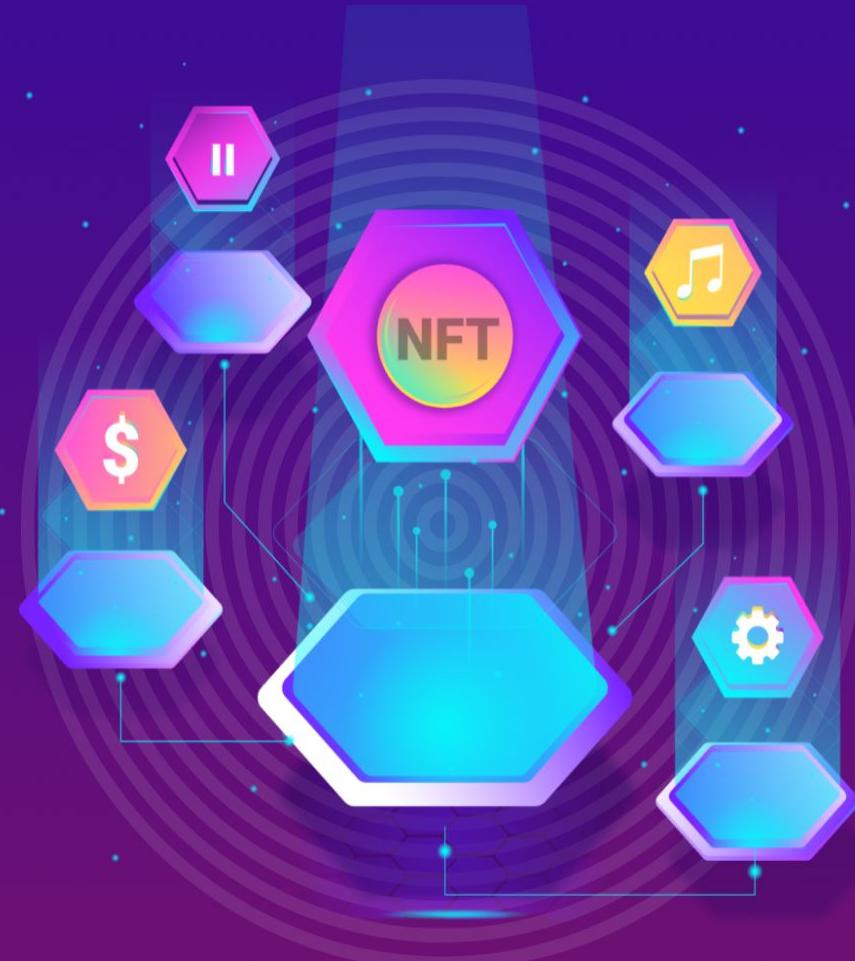

Because an NFT allows joint ownership, owners of an NFT can request supporters for the asset. The supporters' concept will reflect the popularity of it.

Marketing

NFTs can be displayed inside the virtual world on pre-defined slots.

Users can utilise land features to promote their digital assets.

NFT Trading Gas Fees

The NFT community is facing a problem with high gas fees on some of the most popular blockchains i.e. Ethereum.

The ultimate solution for this problem is to create an NFT friendly blockchain that supports different mechanisms for charging gas fees.

Because Foxiverse Chain is a substrate-based chain, dynamic gas fees are programmable. Here are some of the example,

- ▶ NFT trading gas fees can be waived by utilising membership features on the Foxiverse platform
- ▶ The gas fee can be adjusted by the number of NFT supporters and the trader's reputation.

Lands

Stormlands

Stormlands was inspired by the largest and most powerful realm in Westors. This virtual plot is the most affordable option because the distance to the ocean is indeed 0-2021 meters, the center is 4392-8102 meters, the nearest casino is 1869-10139 meters, and the lake is 0-3862 meters.

Wakanda

Wakanda is the name of the island's most advanced nation. It is logical that this virtual plot would be the second least expensive in the game world since the distance to the ocean is truly 0-1841 meters, the center is 3388-6452 meters, the nearest casino is 532-8725 meters, and the lake is 41-4062 meters distant.

Crownlands

Crownlands was inspired by the royal domain. This digital plot is the third-cheapest in the game world, with the distance from the ocean being 0-1688 meters, the center being 2861-5760 meters, the nearest casino being 409-7952 meters, and the lake being 260-4154 meters away.

Lands

Ldoma

Ldoma is known as a "hospitable" and "peace-loving" place. This virtual plot is the fourth most affordable in the game world, with distances of 0-1600 meters to the ocean, 2202-5226 meters to the center, 41-7553 meters to the nearest casino, and 0-4454 meters to the lake.

Freedonia

Freedonia refers to the tiny fictitious area which is known as the "Land of the Brave and Free." This digital parcel is the fifth most affordable in the game world. It is 0-1515 meters away from the ocean, 1669-4587 meters away from the center, 0-6500 meters away from the nearest casino, and 0-4587 meters away from the lake.

Narnia

Narnia is a fantasy land often described as "magical and mysterious." This digital parcel houses the most moderately priced land in the game world. Distances from the ocean, center, nearest casino, and lake are 0-1314 meters, 1104-4023 meters, 0-5746 meters, and 0-4704 meters, respectively.

Lands

Herzoslovakia

Herzoslovakia is a fictitious place with the motto "freedom of religion," which comes from the word "Herzegovina," which means "duke's land" in the original Slavic language. This virtual plot is home to the fifth most expensive in the metaverse game. The ocean, center, nearest casino, and the lake are 0-1292 meters, 300-3348 meters, 0-5253 meters, and 0-4709 meters away, respectively.

Molvania

To create Molvania, we imagined a spot where people might go to get a breathtaking perspective of the island and the unspoiled countryside that inspired it. This virtual plot is the fourth most expensive in the game world, with lengths of 0-1215 meters to the ocean, 0-2631 meters to the center, 0-4727 meters to the nearest casino, and 400-4604 meters to the lake.

Val Verde

Val Verde literally means "green valley." It represents a fictitious location with lush resorts and unexplored, mysterious rainforests. The distance to the ocean from this virtual plot is 0-1215 meters, the distance to the center is 0-1924 meters, the distance to the nearest casino is 100-4010 meters, and the distance to the lake is 700-4392 meters, making it the third most expensive in the game world.

Lands

San Pedro

San Pedro refers to the area that provides opportunities for wildlife viewing. Since the actual distance to the ocean is 0-889 meters, the center is 0-1260 meters, the nearest casino is 123-3589 meters, and the lake is 963-3600 meters, it makes sense that this virtual plot would be the second-most expensive in the game world.

Neverlands

The concept of Neverland came from the concept of a dream world, an ideal or imaginary world. Because the distance to the ocean is actually 0-41 meters, the center is 347-706 meters, the nearest casino is 700-2665 meters, and the lake is 1512-2093 meters away, it stands to reason that this virtual plot would be the most expensive.

Land Economics

	Lands

8	Molvania	250
9	Val Verde	200
10	San Pedro	100
11	Neverland	10
		4810

Supply

Total Land Blocks

- ▶ 30,000 land blocks
- ▶ Future supply or inflation will be determined by the governance of the general council

Land Block Allocation

Supply and ICO (Tokenomics)

The total supply is 1,000,000,000 units, and the supply will be distributed as follows:

► **What is the name of the FOXIVERSE token?**

Token name - DRAM

► **How many tokens will be issued?**

Total supply of 1,000,000,000 (1B) DRAM tokens will be issued.

Utility

The native cryptographically-secure fungible protocol token of Foxiverse (ticker symbol DRAM) is a transferable representation of attributed utility functions specified in the protocol/code of Foxiverse, and which is designed to be used solely as an interoperable utility token.

Further, DRAM provides the economic incentives which will be distributed to encourage users to exert efforts towards contribution and participation in the ecosystem on Foxiverse, thereby creating a mutually beneficial system where every participant is fairly compensated for its efforts. DRAM is an integral and indispensable part of Foxiverse, because without DRAM, there would be no incentive for users to expend resources to participate in activities or provide services for the benefit of the entire ecosystem on Foxiverse. Given that, additional DRAM will be awarded to a user based only on its actual usage, activity and efforts made on Foxiverse and/or proportionate to the frequency and volume of transactions, users of Foxiverse and/or holders of DRAM which did not actively participate will not receive any DRAM incentives
